

Herbs to Avoid in Pregnancy ^{1,2,3,4,5,6}

Common Name	Scientific Name	Reason
Aloe	<i>Aloe</i> spp., Asphodelaceae	Laxative
Anemone, pulsatilla	<i>Anemone</i> spp., Ranunculaceae	Toxic
Angelica	<i>Angelica archangelica</i> and all <i>Angelica</i> species, Apiaceae	Uterine stimulant
Arnica	<i>Arnica</i> spp., Asteraceae	Bioactive (homeopathic is fine)
Ashwagandha	<i>Withania somnifera</i> , Solanaceae	Bioactive, uterine stimulant
Barberry	<i>Berberis vulgaris</i> , Berberidaceae	Bioactive
Basil (medicinal doses)	<i>Ocimum basilicum</i> , Lamiaceae	Uterine stimulant, modest culinary use is fine
Bee balm	<i>Monarda didyma</i> and all <i>Monarda</i> species, Lamiaceae	Uterine stimulant
Beth root, birthroot	<i>Trillium erectum</i> and other <i>Trillium</i> species, Melanthiaceae	Uterine stimulant, hormonal
Black cohosh*	<i>Actaea racemosa</i> , Ranunculaceae	Uterine stimulant, bioactive, hormonal
Black walnut	<i>Juglans nigra</i> , Juglandaceae	Toxic
Blessed thistle	<i>Cnicus benedictus</i> , Asteraceae	Uterine stimulant
Bloodroot	<i>Sanguinaria canadensis</i> , Papaveraceae	Toxic
Blue cohosh	<i>Caulophyllum thalictroides</i> , Berberidaceae	Uterine stimulant, toxic
Blue flag	<i>Iris versicolor</i> , <i>I. virginica</i> , Iridaceae	Bioactive
Boneset	<i>Eupatorium perfoliatum</i> , Asteraceae	PAs (possible), bioactive
Borage	<i>Borago officinalis</i> , Boraginaceae	PAs
Buchu	<i>Agathosma betulina</i> , Rutaceae	Bioactive
Buckthorn	<i>Rhamnus</i> spp., Rhamnaceae	Laxative, bioactive
Butterbur	<i>Petasites</i> spp., Asteraceae	PAs
Calamus, sweet flag	<i>Acorus calamus</i> , Acoraceae	Bioactive

Calendula	<i>Calendula officinalis</i> , Asteraceae	Uterine stimulant
California poppy	<i>Eschscholzia californica</i> , Papaveraceae	Bioactive
Cascara sagrada	<i>Rhamnus purshiana</i> , Rhamnaceae	Laxative, bioactive
Celery seed	<i>Apium graveolens</i> , Apiaceae	Bioactive, uterine stimulant
Cinnamon (in larger doses)	<i>Cinnamomum verum</i> , <i>C. aromaticum</i> , <i>C. cassia</i> , Lauraceae	Bioactive
Coleus	<i>Plectranthus barbatus</i> , also known as <i>Coleus forskohlii</i> , Lamiaceae	Bioactive, uterine stimulant
Coltsfoot	<i>Tussilago farfara</i> and <i>Petasites</i> spp., Asteraceae	PAs
Comfrey, all varieties	<i>Symphytum</i> spp., Boraginaceae	PAs
Cotton root bark*	<i>Gossypium hirsutum</i> , Malvaceae	Uterine stimulant, hormonal
Damiana	<i>Turnera diffusa</i> , Turneraceae	Bioactive
Digitalis, foxglove	<i>Digitalis</i> spp., Plantaginaceae	Toxic
Dong quai	<i>Angelica sinensis</i> , Apiaceae	Uterine stimulant, hormonal
Elecampane	<i>Inula helenium</i> , Asteraceae	Bioactive
Ephedra, ma huang	<i>Ephedra sinica</i> , Ephedraceae	Bioactive
Eucalyptus	<i>Eucalyptus</i> spp., Myrtaceae	Bioactive
Fenugreek	<i>Trigonella foenum-graecum</i> , Fabaceae	Hormonal
Feverfew	<i>Tanacetum parthenium</i> , Asteraceae	Uterine stimulant
Frankincense	<i>Boswellia serrata</i> , <i>B. sacra</i> , Burseraceae	Bioactive
Ginger (high doses)	<i>Zingiber officinale</i> , Zingiberaceae	Bioactive; culinary or small doses are fine
Ginkgo	<i>Ginkgo biloba</i> , Ginkgoaceae	Bioactive
Ginseng, American and Asian	<i>Panax quinquefolius</i> , and <i>Panax ginseng</i> , respectively, Araliaceae	Bioactive
Goldenrod	<i>Solidago</i> spp., Asteraceae	Bioactive
Goldenseal	<i>Hydrastis canadensis</i> , Ranunculaceae	Uterine stimulant

Gotu kola	<i>Centella asiatica</i> , Apiaceae	Bioactive
Gravel root, Joe pye weed	<i>Eutrochium purpureum</i> and <i>E. maculatum</i> (formerly <i>Eupatorium maculatum</i> , <i>E. purpureum</i>), Asteraceae	Potential PAs
Grindelia, or Rosinweed	<i>Grindelia</i> spp., Asteraceae	Bioactive
Hops	<i>Humulus lupulus</i> , Cannabaceae	Hormonal, uterine stimulant
Horehound	<i>Marrubium vulgare</i> , Lamiaceae	Bioactive
Horse chestnut, conker tree	<i>Aesculus hippocastanum</i> , and other species, Sapindaceae	Bioactive
Horsetail	<i>Equisetum hyemale</i> , <i>Equisetum arvense</i> , Equisetaceae	Bioactive
Hyssop	<i>Hyssopus officinalis</i> , Lamiaceae	Bioactive
Japanese Honeysuckle	<i>Lonicera japonica</i> , Caprifoliaceae	Bioactive
Juniper berries	<i>Juniperus</i> spp., Cupressaceae	Bioactive
Kava kava	<i>Piper methysticum</i> , Piperaceae	Bioactive
Lady's mantle	<i>Alchemilla</i> spp., Rosaceae	Hormonal, uterine stimulant
Lemongrass	<i>Cymbopogon citratus</i> , Poaceae	Bioactive
Licorice root, liquorice	<i>Glycyrrhiza glabra</i> , <i>G. uralensis</i> , Fabaceae	Hormonal, bioactive
Liferoot, ragwort	<i>Packera aurea</i> , formerly <i>Senecio aureus</i> , and other <i>Senecio</i> species, Asteraceae	PAs
Lily of the valley	<i>Convallaria majalis</i> , Asparagaceae	Toxic
Lobelia	<i>Lobelia inflata</i> , Campanulaceae	Bioactive
Lomatium, biscuit root	<i>Lomatium</i> spp., Apiaceae	Bioactive
Mimosa	<i>Albizia julibrissin</i> , Fabaceae	Bioactive
Mistletoe	<i>Viscum</i> spp., Santalaceae	Toxic
Motherwort*	<i>Leonurus cardiaca</i> , Lamiaceae	Uterine stimulant
Mugwort, wormwood	<i>Artemisia absinthium</i> , <i>A. vulgaris</i> , and other species, Asteraceae	Uterine stimulant, bioactive
Myrrh resin	<i>Commiphora myrrha</i> , <i>C. molmol</i> , <i>C. wrightii</i> , Burseraceae	Bioactive

Oregon grape root	<i>Mahonia</i> spp., Berberidaceae	Bioactive
Osha	<i>Ligusticum</i> spp., Apiaceae	Bioactive, uterine stimulant
Parsley (in large doses)	<i>Petroselinum crispum</i> , Apiaceae	Uterine stimulant
Pennyroyal	<i>Hedeoma pulegioides</i> and <i>Mentha pulegium</i> , Lamiaceae	Uterine stimulant, toxic
Peony	<i>Paeonia</i> spp., Paeoniaceae	Hormonal
Periwinkle	<i>Vinca</i> spp., Apocynaceae	Bioactive
Pine	<i>Pinus</i> spp., Pinaceae	Bioactive
Pleurisy root	<i>Asclepias tuberosa</i> , Apocynaceae	Bioactive
Poke root	<i>Phytolacca</i> spp., Phytolaccaceae	Toxic
Prickly ash, toothache tree	<i>Zanthoxylum</i> spp., Rutaceae	Bioactive
Rosemary (high doses)	<i>Salvia rosmarinus</i> , Lamiaceae	Bioactive; culinary use is fine
Rue	<i>Ruta graveolens</i> , Rutaceae	Toxic, uterine stimulant
Sage (in larger doses)	<i>Salvia officinalis</i> , Lamiaceae	Uterine stimulant
Sarsaparilla	<i>Smilax</i> spp., Smilacaceae	Hormonal
Sassafras	<i>Sassafras albidum</i> , Lauraceae	Bioactive
Senna	<i>Senna alexandrina</i> , Fabaceae	Laxative
Spikenard	<i>Aralia racemosa</i> , <i>A. californica</i> , Araliaceae	Bioactive
Stillingia	<i>Stillingia sylvatica</i> , Euphorbiaceae	Bioactive
Tansy	<i>Tanacetum vulgare</i> , Asteraceae	Toxic
Thuja	<i>Thuja</i> spp., Cupressaceae	Toxic
Thyme (in large doses)	<i>Thymus</i> spp., Lamiaceae	Bioactive
Tulsi, holy basil	<i>Ocimum tenuiflorum</i> , Lamiaceae	Uterine stimulant
Turkey rhubarb	<i>Rheum palmatum</i> and several other <i>Rheum</i> species, Polygonaceae	Laxative

Turmeric (high doses)	<i>Curcuma longa</i> , Zingiberaceae	Bioactive; culinary use is fine
Uva ursi	<i>Arctostaphylos uva-ursi</i> , Ericaceae	Bioactive
Vervain	<i>Verbena officinalis</i> , <i>V. hastata</i> , Verbenaceae	Uterine stimulant, bioactive
Vitex, or chaste tree	<i>Vitex agnus-castus</i> , Lamiaceae	Hormonal (used in pregnancy with expert guidance)
Wild bergamot	<i>Monarda fistulosa</i> and all <i>Monarda</i> species, Lamiaceae	Uterine stimulant
Wild cherry	<i>Prunus serotina</i> , <i>Prunus virginiana</i> , Rosaceae	Bioactive
Wild ginger	<i>Asarum</i> spp., Aristolochiaceae	Toxic
Wild indigo	<i>Baptisia tinctoria</i> , Fabaceae	Bioactive
Wormwood	<i>Artemisia absinthium</i> , Asteraceae	Bioactive; emmenagogue
Yarrow	<i>Achillea millefolium</i> , Asteraceae	Uterine stimulant
Yellow dock root (in high doses; considered safe in lower doses for both pregnancy and chestfeeding/ breastfeeding/ nursing)	<i>Rumex crispus</i> , <i>R. obtusifolius</i> , Polygonaceae	Laxative

* Herbs that are used in the last week of pregnancy or to stimulate labor.

Health Disclaimer

The content on our website and in our online course manual is for educational purposes only. Although we try our utmost to provide useful and accurate information, you are responsible to research and verify information before relying on it. We are trained herbalists and not licensed or registered health-care practitioners. We cannot diagnose health conditions, nor prescribe medicines legally; we are not medical doctors. However, we will recommend or suggest medicinal herbs for various health complaints, as we believe in the safety and efficacy of botanical medicine.

The information we provide is not intended to be a substitute for medical treatment. Please consult your medical care provider before using herbal medicine, particularly if you have a known medical condition or if you are pregnant or nursing.

You are responsible for your own health. As with conventional medicine, herbal medicine is vast and complex, and must be used responsibly. People react differently to different remedies. Some herbs are contraindicated with certain pharmaceutical drugs. Further, some helpful herbs may be confused with harmful and/or deadly substances.

There are many plants and mushrooms that can make you sick, or are deadly poisonous. Be 100% positive of your identification before you harvest any plant or mushroom. Additionally, sometimes a new food, even properly identified, can cause an unusual reaction – ranging from gastric intolerance to a full-blown allergy. It is your responsibility to make sure you are harvesting the correct plant or mushroom and it is your choice to try any new food. We cannot be responsible for incorrect identification or reactions to plants or fungi.

You are responsible for your own choices. This includes but is not limited to the ingestion, application, or other use of alcohol or any poisonous, toxic, or allergenic substance. In the event that you are not of legal age to consume alcohol, the School recommends that you refrain from the purchase, consumption, or use of alcohol in your studies. If you elect to disregard such recommendation, you do so at your own risk, and the School accepts no liability relating to or arising from your activities.

The School cannot predict how a remedy will work for you. Always refer to your medical care provider for questions about your health.
